

The Perfect Filter

Description

â??Perfect Filterâ?• Whole House System

The Perfect Filter

This is a salt free purification system made with state-of-the-art PF 1025 media design by us for our customers exclusively! This proprietary system reduces micro-plastics, forever chemicals, heavy metals, pharmaceuticals, odors, stale taste, and other impurities! This system reacts with calcium and magnesium in the water so it inhibits scale buildup on vertical surfaces like shower glass and fixtures.

It leaves the calcium and magnesium in the water as important minerals for your health! This system has a micron filtering technology so it only need to rinse 15-20 seconds per week, saving you water and salt over the traditional salt systems that use over 150 gallons of water per month to backwash.

Micron Filtration Membrane

Filters down to 0.01 microns.

Bacteria Reduction

Common bacteria found in San Diego's tap water includes Coliform bacteria, E. coli, pseudomonas aeruginosa & more.

Reduces Harsh Contaminants

The Perfect Filter reduces the presence of lead, heavy metals, micro plastics, PFAS, pharmaceuticals & forever chemicals.

Scale Inhibitor

Reduces scale build up, extending the lifespan of plumbing system and water appliances

Chlorine/Chloramine Removal

Chlorine and chloramine in municipal water can lead to health concerns.

Proprietary Blend of Media

The proprietary media blend PF1025 reduces bacteria, chemicals & contaminants known to cause health problems.

The Perfect Filter Specifications:

- Stainless Steel Housing
- 115 Volts
- 20 ~ 25 GPM Flow
- No Salt Required
- Less Water Waste
